We are delighted to bring you our
 newest «Swissline» product.

Dosing control system EDG50®

Precision you can rely on!

Robust Design

The stainless steel housing and high-quality control elements ensure robustness and an extended service life.

Reliability

Compliance with industrial standards guarantees operational resilience – even under harsh or challenging conditions.

Expandable Functionality

Additional modular options are available:

- Interface extension providing extra 24V inputs/outputs
- Two-valve variant for specific applications requiring a dispensing valve
- Low-pressure variant: 0–1 bar / 0–2 bar

Flexibility

Custom variants are available upon request (even in small quantities).

Service

Our repair service in Matzingen, Switzerland, is ready to assist you, ensuring your device is back in operation as quickly as possible.

EDG50® Tested for Electromagnetic Compatibility (EMC) to Industrial Standards

Through extensive testing and precise EMC evaluations, the EDG50® ensures uninterrupted operation even in electromagnetically demanding environments. By adhering to the highest industrial standards, the device achieves exceptionally low emissions, effectively protecting nearby sensitive equipment from interference and malfunctions.

Our advanced technology delivers maximum durability, ensuring superior operational safety and reliability in production environments.

By choosing the EDG50®, you are opting for quality that enhances your processes, safeguards other equipment and minimizes downtime

Rely on a device engineered to withstand industrial stresses and operate flawlessly, even under the most extreme conditions.
